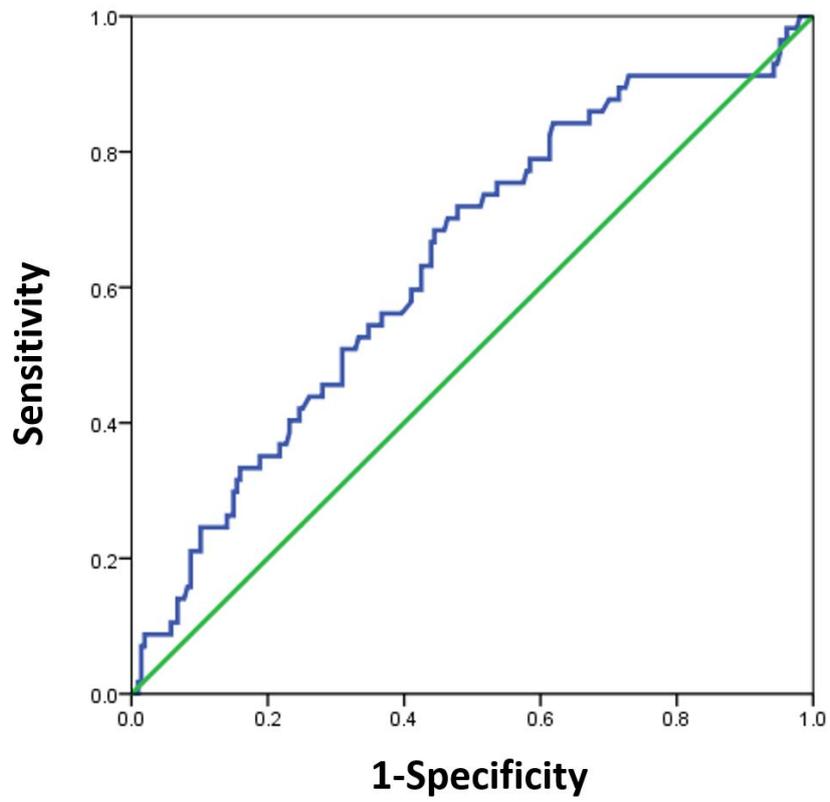

Figure S1. A. ROC curve analysis of baseline plasma TGM2 for the prediction of STEMI. Area under the curve (AUC): 0.703 (95% confidential interval [CI]: 0.639-0.766, $p < 0.001$). B. ROC curve analysis of baseline plasma TGM2 for the prediction of NSTEMI. Area under the curve (AUC): 0.636 (95% confidential interval [CI]: 0.555-0.717, $p < 0.002$). STEMI, ST-segment elevation myocardial infarction; NSTEMI, non-ST-segment elevation myocardial infarction.
